

SPSSEG Addendum #1

From Lance Winecka, Project Manager ([lancew@spsseg.org](mailto:lancew@spsseg.org) or 360-412-0808 x 101)

Deschutes River Ranch Restoration Project: Pasture Services

April 11, 2014

- The term “silage” used in the bid template is comparable to the term “haylage”. For example any material coming off the site must be properly wrapped in plastic to help reduce the spreading of any noxious weeds from the Deschutes Ranch to other sites (similar end result as silage). No open hay bales will be allowed.
- The Farmer may hire a qualified sub-contractor to apply the Milestone herbicide.
- All other project requirements/provisions will remain the same.
- Please submit bids to the address below (the original bid sheet had a wrong zip code):

SPSSEG
